ORDER AMENDING PERMIT

WHEREAS:

1. Permit 17016 was issued to Point Arena Water Works on December 27, 1977 pursuant to Application 25442.
2. Permit paragraph 11 pertaining to the continuing authority of the Board needs to be updated to conform to standard permit term 12 as contained in Title 23 California Administrative Code Section 780(a).
3. Depending on the amount of water permitted and the type of use, standard permit term 29 imposing water conservation is required.
4. The purposes of use and quantity of water specified in Permit 17016 does not meet current Board criteria for inclusion of standard permit term 29.
5. Permit paragraph 15 (standard permit term 29) should be deleted.

NOW, THEREFORE, IT IS ORDERED THAT:

1. Paragraph 11 of this permit is hereby deleted. A new paragraph 11 is added as follows:

Pursuant to California Water Code Sections 100 and 275, and the common law public trust doctrine, all rights and privileges under this permit and under any license issued pursuant thereto, including method of diversion, method of use, and quantity of water diverted, are subject to the continuing authority of the State Water Resources Control Board in accordance with law and in the interest of the public welfare to protect public trust uses and to prevent waste, unreasonable use, unreasonable method of use, or unreasonable method of diversion of said water.

The continuing authority of the Board may be exercised by imposing specific requirements over and above those contained in this permit with a view to eliminating waste of water and to meeting the reasonable water requirements of permittee without unreasonable draft on the source. Permittee may be required to implement a water conservation plan, features of which may include but not necessarily be limited to: (1) reusing or reclaiming the water allocated; (2) using water reclaimed by another entity instead of all or part of the water allocated; (3) restricting diversions so as to eliminate agricultural tailwater or to reduce return flow; (4) suppressing evaporation losses from water surfaces; (5) controlling phreatophytic growth; and (6) installing, maintaining, and operating efficient water measuring devices to assure compliance with the quantity limitations of this permit and to determine accurately water use as against reasonable water requirements for the authorized project. No action will be taken pursuant to this paragraph unless the Board determines, after notice to affected parties and opportunity for hearing, that such specific requirements are physically and financially feasible and are appropriate to the particular situation.

The continuing authority of the Board also may be exercised by imposing further limitations on the diversion and use of water by the permittee in order to protect public trust uses. No action will be taken pursuant to this paragraph unless the Board determines, after notice to affected parties and opportunity for hearing, that such action is consistent with California Constitution Article X, Section 2; is consistent with the public interest and is necessary to preserve or restore the uses protected by the public trust.
